

Dear Hiring Manager,

I'm a developer with a strong interest in automation, system design, and building tools that make tasks simpler and more efficient. My background in Computer Networking & Technical Support gave me a solid foundation in how systems operate, but most of my growth has come from hands-on projects — scripting, automating, and creating solutions that solve problems.

I enjoy understanding how things work and finding ways to improve them. Whether I'm writing scripts, working with APIs, or troubleshooting systems, I approach each challenge with curiosity, attention to detail, and a focus on clean, maintainable design.

I'm excited about the opportunity to contribute to a team where I can continue learning, build meaningful tools, and support systems that people rely on. I would welcome the chance to discuss how my technical background, and passion for automation can support your organization.

Thank you for your time and consideration.

Sincerely, Devin

SUMMARY

Developer with a background in Computer Networking & Technical Support, focused on automation, scripting, and system reliability. Experienced with Linux/Windows environments, server management, and building tools that simplify real-world tasks. Strong problem-solving mindset with hands-on experience in scripting, troubleshooting, and technical analysis.

TECHNICAL SKILLS

Languages & Scripting: Python, Bash, PowerShell, MySQL, JavaScript

Web: HTML, CSS

Systems: Linux (server & desktop), Windows Server(Active Directory)

Tools: Vim, Git, PyCharm, automation scripts, system utilities

Strengths: Troubleshooting, system maintenance, workflow automation, technical analysis

EXPERIENCE

Search Engine Evaluator — Remote (Contract)

- Reviewed and verified NDA-protected content for accuracy and compliance.
- Evaluated language models for performance, reliability, and human-like text generation.
- Tested websites to identify errors, detect fraudulent content, and ensure guideline compliance.
- Moderated user-generated content to maintain safe and appropriate interactions.

Bell Technical Solutions (BTS)

- Copper Technician

- Installed and repaired Phone/TV/Internet

Allied International — Collections Agent

- Contacted clients to arrange payments, provide account updates, and resolve outstanding balances.
- Explained loan terms, APRs, and payment schedules clearly and accurately.
- Guided clients through payment assistance options and outlined consequences of missed payments.

Technical & Project Experience

Bash / PowerShell / Python

- Wrote and debugged scripts for automation, system management, and task scheduling.
- Used PowerShell for system administration and workflow automation.
- Built Python scripts for data manipulation and general automation tasks.

Linux / Windows Server Management

- Managed and maintained Linux and Windows servers, including backups and recovery operations.
- Performed system configuration, updates, and troubleshooting.

Website Design & Hosting

- Built and maintained a Linux-hosted website using Vim & Apache.
- Developed front-end/back-end structure with HTML/CSS/JavaScript
- Maintained DNS records
- Managed email server configuration and maintenance.

Computer Repair

- Installed and configured hardware and software on Linux and Windows systems.
- Performed diagnostics, repairs, and system optimization.

EDUCATION

Diploma — Computer Networking & Technical Support

Seneca College @ York University
